# Three main units. One connected system.

A location overview for a matched tractor installation. Component numbers match the kit sheet.

01

### DP10 display

Inside the cab, within easy reach and view.

02

### FM5 steering wheel

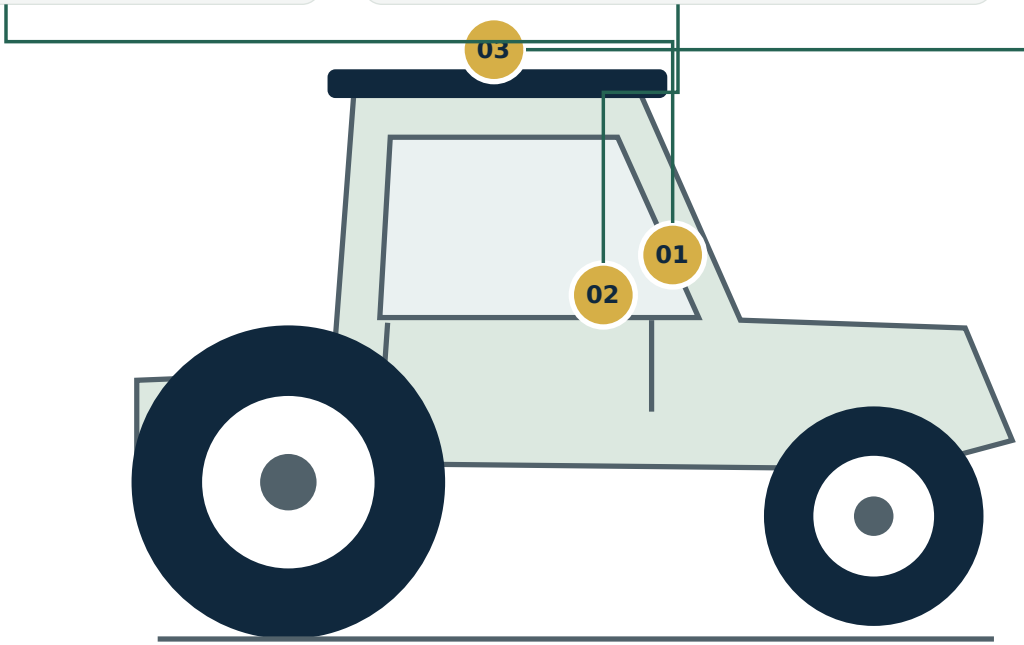

At the steering shaft, using the matched adapter.

03

### FC3 PRO roof unit

On the roof, along the tractor centreline.

GENERIC TRACTOR OUTLINE

### 04 Display mount

Ball base and adjustable clamp arm support the in-cab display.

### 05 Mounting hardware

Use the confirmed bracket and adapter arrangement for this tractor.

### 07 Main harness

Secure away from heat, edges and moving parts; allow steering movement.

### 08 Radio antenna

Install as required by the agreed correction setup.

**FUNCTIONAL RELATIONSHIP**

The integrated harness (07) links the display (01), steering motor (02), roof controller (03) and approved vehicle power.

Location and function only. This is not a wiring diagram; fastening, orientation and routing depend on the tractor.
